واکسن و ویروس کرونا تا اوایل سال ۲۰۲۱ آماده خواهد شد

شرکت زیست فناوری چینی سینوواکروز گفت واکسن کرونا ویروس آن تا اوایل سال آینده برای جهانیان آماده خواهد شد. مدیر عامل شرکت سینوواک قول داد که اگر سومین و آخرین مرحله آزمایش واکسن شرکت بر روی انسان را به اتمام رساند، برای فروش واکسن کرونای ابدایی این شرکت موسوم به کروناواک به سازمان غذا و داروی ایالات متحده مراجعه کند. بین گفت و گو واکسن آزمایشی به او تزریق شده است. وی گفت: در همان ابتدا استراتژی ما تولید واکسن برای چین و ووهان بوده اما بلافاصله پس از آن در ماه ژوئن و ژوئیه ما استراتژی خود را برای تهیه واکسن در جهان تغییر دادیم. هدف ما تهیه واکسن برای ایالات متحده، اتحادیه اروپا و سایر کشورهاست. بین تصریح کرد: بیش از ۲۴ هزار نفر در آزمایشات بالینی این شرکت در برزیل، ترکیه و اندونزی شرکت کرده و آزمایشاتی نیز برای بنگلادش و احتمالا شیلی برنامه ریزی شده است. وی گفت که سینوواک این کشورها را به این دلیل انتخاب کرده است که به دلیل جمعیت زیاد احتمال شیوع جدی تر بیماری در آنجا زیاد است. بین خاطر نشان کرد که وی اولین کسی بود که ماهها پیش واکسن آزمایشی را دریافت کرد، زیرا آفازیک و دو آزمایشات انسانی واکسن مذکور هیچ عوارض جانبی جدی نشان نداد. سینوواک همچنین پس از مشاهده تعداد فزاینده موارد ابتلا به کرونا در کودکان و سالمندان در سطح جهانی، در حال آزمایش دوزهای کمی از کروناواک بر روی کودکان و سالمندان در چین است.

آغاز تحویل ۱.۵ میلیون واکسن آنفلوآنزا به معاونت بهداشت

مدیر کل دارو و مواد تحت کنترل سازمان غذا و دارو گفت: از سوسوم مهر تحویل ۱.۵ میلیون واکسن آنفلوآنزا برای استفاده در شبکه بهداشتی به معاونت بهداشتی آغاز شده است. سید حیدر محمدی مدیر کل دارو و مواد تحت کنترل سازمان غذا و دارو اظهار کرد: توزیع ۱.۵ میلیون واکسن آنفلوآنزا آغاز و در فاز اول در اختیار معاونت بهداشتی قرار خواهد گرفت تا به صورت رایگان به زنان باردار، بیماران خاص، صعب العالج، مزمن و کادر درمان تلقیح شود. وی افزود: در مرحله بعد واکسن آنفلوآنزا برای داروخانه ها توزیع و با ثبت کد ملی به سالمندان بالای ۶۵ سال ارائه خواهد شد که زمان آن متعاقباً از سوی سازمان غذا و دارو اعلام می شود. مدیر کل دارو و مواد تحت کنترل سازمان غذا و دارو در مورد قیمت واکسن آنفلوآنزا توضیح داد: واکسن تامین شده با ارز دولتی ۴۲۰۰ تومانی بوده که قیمت تمام شده آن ۴۴ هزار تومان است و از طریق داروخانه ها در اختیار سالمندان و کودکان قرار می گیرد، قیمت واکسن برای سایر اقشار جامعه در صورتی که تصمیماتی در مورد ارز نیماهی گرفته شود اعلام خواهد شد. او در مورد تاثیر در واردات و توزیع واکسن و نگرانی ها برای آن دست رفتن زمان تزریق واکسن اظهار کرد: سازمان غذا و دارو در زمان مناسب اقدام به ثبت سفارش و تامین واکسن کرده است و تاخیر ایجاد شده به دلیل مشکلات مالی ناشی از تحریم های نظامی آمریکا و تامین ارز بود، اما با تلاش های مقام عالی وزارت و سازمان غذا و دارو امیدواریم واکسن مورد نیاز در زمان مناسب وارد و در اختیار مردم قرار گیرد.

دستور العمل بهداشت کار در شرایط بحرانی تدوین شود

مخفی کردن ابتلا به کرونا از ترس اخراج

نمایندگان افراد مذکور نیز ملزم به استفاده و نگهداری از وسایل حفاظتی و بهداشتی فردی و اجرای دستور العمل های مربوطه کارگاه می باشند. از اشراف منصوری می پرسیم، آیا می توان این ماده را به شرایط کار وایمی که کارفرمایان وسایل ایمنی و بهداشتی مقابله با کرونا را در اختیار کارگران قرار دهند؟ او می گوید: شیوع کرونا در ایران و جهان ما را با شرایط تازه ای روبه رو کرده است. قبلاً چنین وضعیتی نداشتیم که درباره آن قانون یا آیین نامه ای داشته باشیم. در ایران فقط پروتکل های وزارت بهداشت هستند که در اجرای آن مشکلاتی وجود دارد. هر چند این پروتکل ها الزام آور هستند، اما برای اجرا شدن لازم است وزارت کار به عنوان متولی کار در کشور به موضوع ورود کند؛ اتفاقی که رخ نداده است. در ایران نشانه هایی از بازگشت محدودیت ها نیست، علاوه بر اینکه اگر قرار باشد محدودیت ها بازگردند با توجه به شکنندگی بودن وضعیت اقتصادی، خیلی ها از آن استقبال نمی کنند، مگر اینکه کمک های دولتی قابل توجهی بهداشت کار کشور توضیح می دهد: تا وقتی وزارت کار به عنوان متولی کار در بحث رعایت پروتکل های بهداشتی مداخله نکند، مشکلاتی در حوزه کار پیش می آید. شرایط خوب این است که هم پروتکل ها رعایت شود و هم کارگر متضرر نشود. این اتفاق رخ داده که کارگرانی دچار کرونا شده اند و وقتی این را اعلام کرده اند کارفرما

بیش از هفت ماه از اعلام رسمی شیوع کرونا در ایران می گذرد و آنطور که مسئولان حوزه بهداشت و درمان می گویند، در بسیاری از استان ها وارد موج سوم کرونا شده ایم. به گزارش ایلنا، در حالی است که ممنوعیت ها محدودیت های ناشی از کرونا تقریباً برپا داشته شده و در زمینه فعالیت کارمندان، کارگران و صاحبان حرف و مشاغل مثل زمان عادی رفتار می شود. با توجه به نزدیک شدن به فصل سرما و احتمال شیوع آنفلوآنزا، این نگرانی وجود دارد که با هم در آمیختن این بیماری ها شرایط وخیمی را به وجود بیاورد. این شرایط برای بسیاری از کشورهای دیگر هم اتفاق افتاده: خیلی از آنها محدودیت ها را بازگردانده اند یا به فکر بازگرداندن آنها تا زمان تولید واکسن و ایمنی همگانی هستند. ابوالفضل اشرف منصوری رئیس انجمن های صنفی مسئولین کمیته های حفاظت فنی و بهداشت کار کشور) علاوه بر توصیف شرایط، راهکاری برای کم کردن خطرات ارائه می دهد.

داریم. این می تواند به بحث معاینات و مراقبت ها و همچنین پروتکل های بهداشتی کمک کند، اما در کارگاه های کوچک و در میان کارگران فصلی و مشاغل آزاد چنین امکانی نیست. اینجا تنها چاره ای که می ماند آگاهی بخشی است، یعنی باید از طریق رسانه ها به کارگران آموزش خودمراقبتی داد. البته این مصونیت صددرصدی نمی آورد. در هر صورت باید الزاماتی هم رعایت شود، یعنی بحث فاصله گذاری اجتماعی امکان پذیر شده و رصد شود و همچنین امکاناتی برای ماسک زدن، ضد عفونی کردن و... فراهم شود. درست است که وزارت بهداشت پروتکل تهیه و الزامی کرده است که آن را رعایت کنند، اما در بحث اجرا مشکلاتی هست.

پنهان کاری در زمینه کرونا گزارشی رسیده که نشان می دهد در برخی موارد ابتلا به کرونا برابر با باز دست دادن شغل شده است. اشرف منصوری دلیل این اتفاق را همان عدم مداخله وزارت کار در بحث ایمنی کرونا می داند. رئیس کنون انجمن های صنفی مسئولین کمیته های حفاظت فنی و بهداشت کار کشور توضیح می دهد: تا وقتی وزارت کار به عنوان متولی کار در بحث رعایت پروتکل های بهداشتی مداخله نکند، مشکلاتی در حوزه کار پیش می آید. شرایط خوب این است که هم پروتکل ها رعایت شود و هم کارگر متضرر نشود. این اتفاق رخ داده که کارگرانی دچار کرونا شده اند و وقتی این را اعلام کرده اند کارفرما

راهکارهای اساسی برای جلوگیری از خشکی پوست در پاییز

گر فتار می شوند، بیشتر بخوانید: توصیه های متخصص طب سنتی همزمان با آغاز فصل پاییز این متخصص پوست و مو با بیان اینکه افراد مسن بیشتر از بقیه دچار آگزما و خشکی پوست می شوند، اظهار کرد: با افزایش سن رطوبت پوست کاهش پیدا می کند و در فصل سرما این کاهش رطوبت تشدید می شود و در نتیجه احتمال ایجاد آگزما بیشتر است. وی افزود: همچنین افرادی که به دلیل داشتن بیماری مزمن قلبی و کلیوی داروهای مدر استفاده می کنند و افراد مبتلا به دیابت به علت اختلال عصبدهی به پوست انتهای اندام ها، احتمال خشکی پوستشان بیشتر است. این متخصص پوست در خصوص راهکارهای کاهش خشکی پوست در فصل سرما توضیح داد: همه افراد به ویژه اشخاص مستعد خشکی پوست بهتر است در ۶ ماه دوم سال به طور مرتب دست های خود با کرم های چرب کننده، چرب نگه دارند، چرا

یک متخصص پوست و مو به بیان راهکارهایی برای مقابله خشکی پوست در فصل پاییز پرداخت. عاطفه گلشن در گفت و گو با میزان به بیان راهکارهایی برای مقابله خشکی پوست در فصل پاییز پرداخت و گفت: در ۶ ماه دوم سال با آغاز فصل سرما و کاهش رطوبت هوا افراد بیش از قبل دچار خشکی پوست می شوند و احتمال ایجاد آگزما، ترک ها، ششایار و خارش های پوستی به ویژه در افرادی که پوستشان مستعد خشکی باشد، افزایش می یابد. وی ضمن اشاره به اینکه افرادی که سابقه آگزما دارند، مستعد خشکی پوست هستند و مشکلاتشان در فصل پاییز تشدید می شود، ادامه داد: برخی از افراد به صورت ارثی و از دوران کودکی خشکی پوست و آگزما دارند و بعضی دیگر به صورت اکتسابی دچار این عارضه می شوند، برای مثال اشخاصی که زیاد از مواد شوینده استفاده می کنند، بیشتر به آسیب های پوستی و خشکی پوست

Iran constructing 100,000 residential units for less privileged citizens, VP says

Iranian government is constructing some 100,000 residential units for the poor and less privileged class of the society, Vice President and Head of the Budget and Planning Organization Mohammad Baqer Nobakht said on Friday.

He made the remarks during a meeting with local officials as part of a visit to southwestern province of Ilam.

Nobakht said that the housing project is being carried out by Imam Khomeini Relief Foundation and Housing Foundation of Islamic Revolution in collaboration with the Budget and Planning Organization.

The official noted that this is a project separate from other government plans to provide housing for the Iranian people.

Those eligible to receive the new facilities will not need to pay any amount in advance, Nobakht said.

New Russian Contractor to Build 1.2\$B Sirik Power Plant

A new contractor has been appointed by Russia for the construction of a 1400-megawatt Power Plant in Sirik County, Hormozgan Province, the energy minister said in Tehran said Tuesday without naming the new contractor.

Reza Ardakanian added that the Russian side finally decided to change the contractor and construction is expected to start within weeks, the Energy Ministry news portal Paven reported.

In 2016, Iran's Thermal Power Plants Holding Company signed a contract with Russia's Technopromexport to build the power plant comprising four units of 350 MW each.

However, the project never saw the light of day. Ardakanian expressed the hope that with funding from the Russian Federation work would start by the new contractor in the coming weeks.

Sirik Power Plant is estimated to cost \$1.2 billion. The Russian side has agreed to put up 85% of the cost and the rest will be paid by Iran's Bank of Industry and Mine. Construction of the thermal power station in the southern province will create 3,000 jobs and 500 more will work at the plant when the first unit goes on stream. The plant is planned to be completed in five years.

Sirik County overlooks the Strait of Hormuz, between the Persian Gulf and the Oman Sea.

More Power for Hormozgan

Last week two gas units of Qeshm Combined Cycle Power Plant in Qeshm Island were synchronized with the national grid.

The units have 170 MW capacity each. A steam turbine with 160 MW capacity is also under construction.

Work on the construction of Hengam Combined-Cycle Power Plant in Bandar Abbas is underway as well and its two gas units will be launched by next March. Hengam is among the first combined cycle plants to use F-class gas turbines that are defined by high performance, low power generation costs, long intervals between inspections, and a service-friendly design.

The gas units each have 307-MW capacity. A 292-MW steam unit will come online next year and total capacity will reach 906 MW. It is scheduled to be fully operational in 2021 and cost \$560 million.

On completion, the plant will supply electricity to 150,000 homes in the southern province. The Hengam plant will have an efficiency rate of 59%, which is the highest for a plant with F-class turbines.

Thermal power plants in Hormozgan Province have installed capacity of over 3,000 MW and there are plans to increase output to 7,000 MW by 2024.

Auto Output Up 21% in 5 Months

Iran's automotive output increased by 21% during the first five months of the current Iranian year (March 20-Aug. 21) compared to the year-ago period. According to data released by the Industries Ministry, a total of 377,000 cars and commercial vehicles were produced in Iran during the five months, which figure was 311,330 year-on-year. The output of passenger cars saw an 18.4% rise, reaching 344,800 units and the number of pickup trucks reached 31,528, which is 38.4% higher than the 19,500 produced in the same period of last year.

The production rates for vans, buses and minibuses show a 5.9% decrease in output, dropping to 673 units. Saeed Zarandi, a deputy industries minister, says automakers plan to produce up to 1.2 million vehicles by the current Iranian year end (March 2021). Last fiscal year (ended March 19, 2020), domestic automakers produced a total of 927,197 vehicles, 855,000 of which were passenger cars. Since July, the ministry has resumed the release of auto production reports after a long gap.

Consumer Inflation Hits 26%

The average goods and services Consumer Price Index in the 12-month period ending Sept. 21, which marks the end of the sixth Iranian month, increased by 26% compared with the corresponding period of last year, latest data released by the Statistical Center of Iran show. SCI had put the average annual inflation rate for the preceding Iranian month, which ended on Aug. 21, at 25.8%. Consumer inflation for the month under review (Aug. 22-Sept. 21) registered an increase of 34.4% compared with the similar month of the previous Iranian year. The year-on-year inflation of the month ending Aug. 21 was 30.4%. The overall CPI (using the Iranian year to March 2017 as the base year) stood at 244.3 last month, indicating a 3.6% rise compared with the previous month. Month-on-month consumer inflation was 3.5% for the preceding month (July 22-Aug. 21).

Groundwater Extraction a Serious Cause for Concern

On average 50 billion cubic meters of water is extracted from almost 500,000 authorized wells per year, resulting in huge water deficits in most plains, director of the National Water and Wastewater Engineering Company of Iran (Abfa).

"Of this massive volume, 90% is used for farming," Qasem Taqizadeh

Khamesi was quoted as saying by IRNA.

Rapidly declining water resources has compelled the government to increase the number of plains from which water withdrawal is banned from 69 in 1968 to 405 now, he added.

"Banned plains account for 95% of the underground water that is depleting faster than expected."

According to Abfa data, there are almost half a million authorized wells in Iran, of which 85% are used by farmers. Close to 50,000 belong to industries and the rest for household consumption. "Water deficit from underground sources has reached 140 bcm and a permanent end must be put to issuing new licenses to dig wells," he said, noting that current extraction levels should be reduced by at least 14 bcm per annum.

Under the worsening conditions, issuing new licenses for wells means disregarding the future

generations' right to water, he warned.

Almost 320,000 illegal wells have been identified and are being sealed gradually.

Iran registered significant improvement in rainfall in March and April when precipitation in most provinces exceeded the average in 50 years.

Industrial Use In related news, the news agency quoted Mohammad Mehdi Javadianzadeh, head of Yazd Regional Water Company, as saying that one million cubic meters of water is drawn annually from under the ground for industrial use in the province.

"We have problems supplying water to large industries due to the severe lack of resources, especially in Khatam County where the conditions are serious cause of concern."

If the unsustainable water use patterns do not change, water supply

to the residents in the county will be cut sooner rather than later, he warned.

The best way to replace groundwater for industries is to use treated wastewater. However, such projects usually take at least three years and are a long time coming, Javadianzadeh said.

Groundwater overdraft can lead to the destruction of vegetation; increase the possibility of dust storms, create sinkholes in the plains, increase salt content in groundwater and worsen land subsidence.

Although industries are the biggest employers and main contributors to value added in the province, "the agriculture sector tops the list of water consumption with the lowest employment rate and insufficient value added," Javadianzadeh complained.

Yazd Regional Water

Company has adopted measures including smart meters or water wells, restricting cultivation of water-intensive crops, improving farming methods, promoting drip irrigation and sealing illegal wells.

Located in the center of Iran where two deserts Dasht-e-Kavir and Dasht-e-Lut meet, the unusually dry province has a yearly precipitation of 49 millimeters and hardly 23 days of rainfall. The declining pattern of groundwater levels in many regions has turned into a critical national problem, as in most countries both in the developing and developed world.

Plains in Arak and Saveh in Markazi Province are among the most critical areas where water underground water deficit has surpassed 200 million cubic meters due to unsustainable water use by largely by farmers and industries.

Iran Air to Operate Lamerd-Dubai Flights

Iran Air, the country's national flag carrier airline, will launch roundtrip Dubai-Lamerd-Dubai flights as of Sept. 27, the director of Lamerd International Airport says. "The flight will operate on Sundays using ATR 72," Sohrab Azizi was also quoted as saying by

the Ministry of Roads and Urban Development's news service.

Lamerd International Airport's new passenger terminal was inaugurated on April 23 by President Hassan Rouhani via video conference. "The airport's passenger capacity has now increased from 150,000 to 900,000 per year," Siavash Amirmokri, managing director of Iran

Airports Company, said.

The airport is located in the city of Lamerd, the capital of Lamerd County in the southern Fars Province.

The expansion of the terminal, spread over 5,500 square meters, started in the fiscal 2014-15. More than 400 billion rials (\$1.46 million) have been invested in the project.

Iran attending Maritime Silk Road exhibition in China

21st Century China Maritime Silk Road exhibition opened in China on Thursday in presence of Chinese officials and representatives from different countries in Guangzhou, Guangdong Province. China Maritime Silk Road exhibition that has been held since 2014 as the 21st Century Maritime Silk Road Expo, hundreds of companies from China and partner countries are participating in the "One Belt, One Road" initiative and shows its capabilities in the exhibition.

The Islamic Republic of Iran's pavilion is active in this exhibition with the efforts of the Consulate General of Iran in Guangzhou. The "Silk Road Economic Belt" and "21st Century Maritime Silk Road" are initiatives first introduced by President Xi Jinping in the fall of 2013 during visits to Kazakhstan and Indonesia, respectively to revive the ancient Silk Road which is to connect the Asia-Pacific economic circle in the east and the European economic circle in the west.

Iran Warns US of 'Decisive' Response in Case of Any Aggression

A defense adviser to Leader of the Islamic Revolution Ayatollah Seyed Ali Khamenei warned there would be a "decisive" response to any act of aggression by the US against Iran.

"Mobilizing the region's reactionary states to help the Zionist regime will not destroy the cause of Palestine," Brigadier General Hossein Dehqan said in remarks on Thursday.

The normalization will only draw the wrath of the Arab and Muslim nations in a way that those behind the agreements will regret it, he added.

"The US has learned its lessons from Iran's Sacred Defense," the general said, warning that if Americans try to create a new anti-Iran alliance and commit a new act of folly, they will receive a "decisive" response.

"We tell the US president not to play with the lion's tail," he said.

Last year, Washington embarked on a mission to garner support for an anti-Iran military coalition, which did not receive the support the US expected as even some of its allies refused to join the alliance.

Iran has warned against attempts by the United States to form such a coalition against the Islamic Republic, saying such measures are destined to fail. Tehran has also time and again underlined that it does not seek war with the US, yet stands ready to defend its interests in the region.

Khanzadi: US terrorist squadron in region has just a 'showing' nature

Iran's Navy Commander Rear Admiral Hossein Khanzadi said that the nature of the US terrorist squadron, which is recently entered the region, is just for showing off.

Speaking in a TV interview with IRIB Channel 2 on Thu., he reiterated that the US terrorist naval fleet, which has recently entered the region, has merely a 'showing' nature.

Army Navy and IRGC Navy are united and defend the areas under the jurisdiction and sovereignty of the Islamic Republic of Iran in waters,

borders and interests of the country wholeheartedly, Khanzadi emphasized.

Islamic Revolutionary Guards Corps (IRGC) is responsible for providing security in the Strait of Hormuz and the Persian Gulf while IRGC Army Navy is responsible for providing security in eastern region in the Strait of Hormuz and north of the Indian Ocean, exceeding 2.1 million square kilometers land area, he underlined.

He went on to say that Iran's Navy is closely monitoring the Navy Fleet of the US terrorist regime from the earliest time of entering its fleet to the region up to the end of exiting the area.

Elsewhere in his remarks, Khanzadi pointed to the arrival of new naval group of US terrorists in the Persian Gulf region and reiterated, "This move has a politically-motivated approach and does not affect the security of region, because, waters under Iran's jurisdiction and

sovereignty enjoy high security."

He further pointed out that Iran's Navy is vigilant and monitor all the vessels of trans-regional countries, whether American or non-American vessels, which enter the region round-the-clock.

Today, Americans have exposed themselves to the Navy of the Islamic Republic of Iran and if they make the slightest mistake at any moment, they will receive a very strong response from the Islamic Republic of Iran, Iran's Navy Commander Khanzadi underlined.

Sports, tourism key pillars in boosting vitality, health

At the inauguration ceremony of 422 projects on Thursday, Iranian President Hassan Rouhani noted that Sport and tourism are two key pillars in boosting vitality and health in society.

The President described sports and tourism as two important pillars in strengthening the vitality and health

of the society and very important and emphasized that we should not only protect the cultural heritage of the country for thousands of years but also provide more opportunities to provide it to the world so that by seeing these great and magical works, the world knows what important records this nation has.

Speaking on Thursday at the inauguration ceremony of 422 projects, including 335 projects in the field of sports and youth and 87 projects in the field of tourism, Rouhani said, "Any tourism that visits our tourist attractions in Isfahan, Shiraz, Yazd, Tabriz, and other countries becomes really fascinated by the civilization of our dear and great Iran and the world sees that this nation is a nation that has a history of more than 7,000 years and its civilizational traces are evident in our land."

The President stressed that the Government of Prudence and Hope has made a very large move to register historical monuments, return historical objects from different countries, and prepare the ground for

attracting domestic and foreign tourists over the past 7 years.

Referring to parts of the report of the Minister of Cultural Heritage, Handicrafts and Tourism, said, "Over the past 7 years, we have grown by 50% in the construction of hotels and 46% in hotel beds and foreign and domestic tourist attractions."

The President expressed hope that with the end of the coronavirus era, we will see further development of the tourism industry in the country.

The President also mentioned the strengthening of public and championship sports in the country as other priorities of the government of Prudence and Hope during the last 7 years and said, "Construction of stadiums, sports hotels, required tracks, facilities and equipment to promote the country's sports and hosting the Iranian flag in international

championships is very important for the health of our young generation and people."

The President referred to the development of women's sports in the country and said, "I am very proud of the development of women's sports in the country. Our women's sports show that the propaganda they have carried out against Iran over the past years has been false and inaccurate." Rouhani stated, "Islam is the religion of freedom and the religion that sets the stage for social activity for everyone within the framework of Islamic ethics, and our women can be active in science, knowledge, political activity and social activity everywhere."

In the twenty-fifth week of the inauguration of national projects across the country with the slogan of 'Prudence and Hope for Surge in Production', 422 projects, including 335 projects in the field of sports and youth and

87 projects in the field of tourism, were inaugurated by the President.

12 hotels, 17 tourism and accommodation complexes, 23 traditional catering and dining units, 5 leisure and entertainment projects, and 30 eco-tourism resorts with an investment of 1.068 trillion Tomans and job creation for 1,746 people were among the tourism projects in East Azarbaijan, Ardabil, Khorasan Razavi, Fars, Kermanshah, Mazandaran, Gilan, Yazd, and Tehran provinces that were inaugurated by the order of the President.

In this ceremony, Sanandaj ports hall, Gorgan sports hotel, 4 sports stadiums in Sabzevar, Neishabour, Kazerun, and Malayer cities, as well as 108 sports fields and 220 rural sports houses were opened in the country.

To implement these plans and projects in the field of the Ministry of Sports and Youth, 345 billion tomans have been invested.

The President expressed hope that with the end of the coronavirus era, we will see further development of the tourism industry in the country.

FM Zarif: Iran, Russia need to continue ongoing talks, mutual ties

Iranian Foreign Minister Mohammad Javad Zarif said that the Islamic Republic of Iran and the Russian Federation need to continue ongoing talks and strengthen its ties.

Given the sensitive regional and international situation, the two countries need to strengthen their ties with each other permanently.

He made the remarks in Moscow on Friday and termed his meeting with his Russian counterpart Sergey Lavrov 'positive and constructive'.

"This trip paved suitable ways for discussing Syria's developments in line with coordinating our positions on Syria and Afghanistan as well as Joint Comprehensive Plan of Action (JCPOA)," Zarif added.

Given the role that Russia has played in the Board of Governors (BoG) of IAEA and in the UN Security Council, giant steps and successful moves have been taken in this regard, he underlined.

Iranian foreign minister reiterated, "These are good opportunities for dialogue and Russia is a neighbor, a permanent member of the UN Security Council and a strategic friend of Iran, and I believe that these talks are needed by both countries."

IRGC Navy to Get Oceangoing Warships

The Islamic Revolution Guards Corps is going to equip its Navy with oceangoing warships capable of carrying helicopters, a senior commander said.

Speaking at a televised interview on Thursday night, IRGC Navy Commander Rear Admiral Ali Reza Tangsiri said oceangoing vessels will join the naval fleet in the near future. The homegrown oceangoing warships, 65 meters in length, will carry helicopters, he noted.

The commander also unveiled plans to equip the IRGC Navy with vessels with a velocity of 94 knots and powerful missile-launching ships.

On the new drones and helicopters that joined the IRGC Navy's fleet on Wednesday, Tangsiri said the advanced combat and vertical take-off and landing (VTOL) drones can carry a payload of laser-guided accurate bombs in an operational range of 1,500 kilometers.

The commander also said the IRGC Navy operates "flying boats" that can carry divers and fire missiles in major operations, saying they would cruise as a watercraft in case of any engine trouble.

The IRGC Navy on Wednesday received 188 new naval drones and helicopters, including Sephehr VTOL drone, Shahab-2, and Hodhod-4VTOL drone.

Another drone that joined the IRGC Navy's fleet was Mohajer-6, an all-weather pilotless aircraft with a range of 200 kilometers and designed to carry a payload of 4 missiles.

FM Zarif: US illegitimate demand not welcomed even among its allies

Iranian Foreign Minister Mohammad Javad Zarif said that Washington's illegitimate demand is not popular even among its allies.

Speaking in his meeting with his Russian counterpart Sergey Lavrov in Moscow on Thu., he pointed to Russia and China that resisted against US moves which contradict the international norms and laws and reiterated that the US illegitimate demand is not popular even among "its allies".

In this bilateral talk, Zarif praised Russia's constructive position with regards to Iran's nuclear program, JCPOA, and added, "Russia's role in this sensitive condition was very serious and constructive which will go down in the history of the UN Security Council."

The current relations between Iran and Russia is at the highest level which is unique of its kind in the history of bilateral ties, he said, adding, "Relations between Tehran and Moscow is based on international law and will of people of the two countries."

Elsewhere in his remarks, Zarif referred to the US threat and said, "The fact that the US is threatening the world with cross-border sanctions is the greatest sign of failure in policies of this country towards the Islamic Republic of Iran."

After the US faced global opposition and failed in activating the so-called snapback mechanism, it resorted to threatening countries in the world and this means the White House's disgraceful failure, FM Zarif emphasized.

In his joint press conference with his Russian counterpart, Zarif said, in response to a question about the process of extending the comprehensive cooperation agreement between the two countries, "This contract was signed and sealed 19 years ago for a period of 10 years and will be extended for another 10 years but it will be automatically renewed at the end of

agreement."

Then Zarif pointed to the continuation of talks between Tehran and Moscow on the renewal of comprehensive cooperation agreement between the two countries and added, "We hope that a complete agreement with new terms and conditions will be concluded between Iran and Russia."

IRGC to build first domestic petrorefinery in

Bandar Abbas

The construction process of the first domestic petro refinery in Bandar Abbas was initiated in the presence of IRGC commander Major General Hossein Salami on Thursday. During the ceremony, Salami noted that the construction of this refinery paves the way for the self-sufficiency and economic independence of the Islamic Republic of Iran. He went on to say that IRGC is implementing more than 220 major infrastructure projects in the country and despite the sanctions, no project has been stopped. "IRGC is using all its capacities to develop Iran, and we will defeat the enemy just as we did in the past," he said. The director of Khatam al-Anbiya Construction Headquarters Saeed Mohammad also said that the refinery will have the capacity to produce 120,000 barrels of natural-gas condensate per day.

Iran Air Force Unveils New Homegrown Radar

The Islamic Republic of Iran Air Force (IRIAF) during a ceremony on Thursday unveiled a new radar system dubbed Soroush. The radar system that has been designed and developed by the IRIAF experts joined the country's integrated air defense network at the ceremony, which was attended by Commander of the Iranian Army's Air Defense Force Brigadier General Alireza Sabahifard. It can detect targets with small cross-section area (RCS) at low and medium altitudes within a range of 220 kilometers.

EU Urges New Measures to Mitigate Coronavirus Second Wave

The European Commission urged EU members states Thursday to better explain and enforce social distancing and hygiene rules to halt a dangerous new wave of coronavirus infections.

Health commissioner Stella Kyriakides said: "In some member states, the situation is now even worse than during the peak in March. This is a real cause for concern."

"All member states need to roll out measures immediately and at the right time at the very first sign of potential new outbreaks."

Europe has now had more than five million coronavirus cases, and several countries have begun reimposing local lockdown rules to head off a return to uncontrolled spread.

The death rate has not returned to the levels seen earlier this year, but cases of new infections are soaring once again in many areas.

But Kyriakides, whose office has sought to coordinate the response across the 27 member

states, warned that some areas had clearly begun to lift restrictions too soon.

"What this means, to be very clear, is that the control measures taken have simply not been effective enough or not being enforced or followed as they should have been," she said, AFP reported.

"We cannot lower our guard. This crisis is not behind us. Moreover, winter is the time of the year for more respiratory illnesses, including seasonal influenza."

And she warned: "Today we're here to call on everyone to act decisively... it might be our last chance to prevent a repeat of last spring."

Kyriakides said that member state governments would have to fight misinformation about the virus and reach out to young people to head off protests and conspiracy theories.

And she warned they will have to act quickly to prevent a need for a return to generalized lockdowns, which she said would hurt the economy, education and the mental health of the public.

"We cannot lower our guard. This crisis is not behind us. Moreover, winter is the time of the year for more respiratory illnesses, including seasonal influenza."

Rear Admiral Tangsiri: Sacred Defense, symbol of people's resistance against enemies

IRGC Navy Commander Rear Admiral said that Sacred Defense is manifestation of resistance of Iranian people against the conspiracies waged by the Global Arrogance against the country.

Speaking in an interview with Mehr news agency on Fri., Ali Reza Tangsiri pointed out that the 'Sacred Defense' is a symbol of unique resistance and perseverance of people against conspiracies of the Global Arrogance and enemy that had

been armed to teeth. It is very important to pay due attention to the Sacred Defense and use the valuable experiences of that period to overcome difficulties and problems facing ahead of the country in various fields, he said, reiterating, "Sacred Defense is a manifestation of resistance, perseverance, endurance, and self-sacrifice of people against enemies' plots."

Turning to Operation Beit ol-Moqaddas and Liberation of Khorramshahr, Tangsiri added, "In Liberation of Khorramshahr, Iranian combatants in the war fronts during the Sacred Defense showed well that they can do a giant and great work with relying upon the Almighty God."

Elsewhere in his remarks, IRGC Navy commander reiterated, "War and its valuable experiences are a turning point in the history of Islamic Iran while Liberation of Khorramshahr is a turning point in the Sacred Defense and a symbol of unique resistance of people against the conspiracies of the Global Arrogance and the enemy which had been armed to teeth."

More than 200 Retired Generals, Admirals Endorse Biden for US President

More than 200 retired generals and admirals endorsed Joe Biden for US president in a letter published Thursday, saying he had the character and judgment to serve as commander-in-chief instead of US President Donald Trump, who has failed "to meet challenges large or small."

The retired officers and officials said the country needs a principled, honest leader who shows empathy for fellow citizens, values alliances, makes informed decisions and takes personal responsibility.

Some of the officers who signed the letter supporting Biden had retired only in the past few years, including Air Force Gen. Paul Selva, who served as vice chairman of the Joint Chiefs of Staff under Trump before he retired in August 2019; Vice Adm. Gardner Howe, a Navy SEAL leader who also retired last year; and retired Adm. Paul Zukunft, who oversaw the Coast Guard until 2018. The list of signatories featured 22 retired four-star military officers, among them Navy Adm. Samuel Locklear, who oversaw all US forces in the Pacific from 2012 to 2015, and Adm. Harry Ulrich, who commanded US naval forces in Europe during President George W. Bush's administration.

The retired top brass signed the letter backing Biden along with nearly 300 other former national security officials and diplomats. William Webster, the former director of the CIA and the FBI, was among the signatories, along with five former defense secretaries: William Perry, William Cohen, Chuck Hagel, Leon Panetta and Ash Carter.

"My own personal view is that I have a duty to be involved in civic matters of the nation that I'm a citizen" of, retired Adm. Steve Abbot said of his decision to sign the letter.

Abbot served as commander of the US Sixth Fleet and commander of Naval Striking and Support Forces in Southern Europe, and he later became Bush's acting homeland security adviser. He said that he believed he had a duty to speak out as a citizen and that he was troubled initially by Trump's comments about the late Sen. John McCain in 2016.

"To hear someone say that John McCain was a loser and they don't like people who become prisoners, I just knew I was going to have trouble going forward with somebody who held those views," he said, NBC News reported.

"Over the past four years, I've seen what is a clear

manipulation of our military to serve his personal needs," Abbot said. "The military has been a loyal, reliable constant in this country because of its apolitical nature. And here we had a president working to undermine it."

In August, more than 70 former senior national security officials — most of them Republicans who worked in previous GOP administrations — issued a similar letter throwing their support behind Biden, arguing that Trump had undermined America's role in the world. In the 2016 election, dozens of former Republican senior national security officials came out against Trump and became known as "Never Trump" Republicans. Many were blacklisted for jobs in the Trump administration for having signed the letters.

By law, military service members must remain apolitical while in uniform, but most senior officers stay out of the political arena even after they hang up their uniforms. Although the number of retired senior officers wading into politics has steadily increased over the past two decades, Thursday's letter was notable for the sheer number of top brass from every branch of the military who chose to endorse Biden.

"We are Republicans, Democrats, and Independents. We love our country. Unfortunately, we also fear for it," they wrote.

The retired officers and officials said the country needs a principled, honest leader who shows empathy for fellow citizens, values alliances, makes informed decisions and takes personal responsibility.

"While some of us may have different opinions on particular policy matters, we trust Joe Biden's positions are rooted in sound judgment, thorough understanding, and fundamental values," they wrote.

"The current President has demonstrated he is not equal to the enormous responsibilities of his office; he cannot rise to meet challenges large or small. Thanks to his disdainful attitude and his failures, our allies no longer trust or respect us, and our enemies no longer fear us," the letter says. "Climate change continues unabated, as does North Korea's nuclear program."
